What We'll Cover

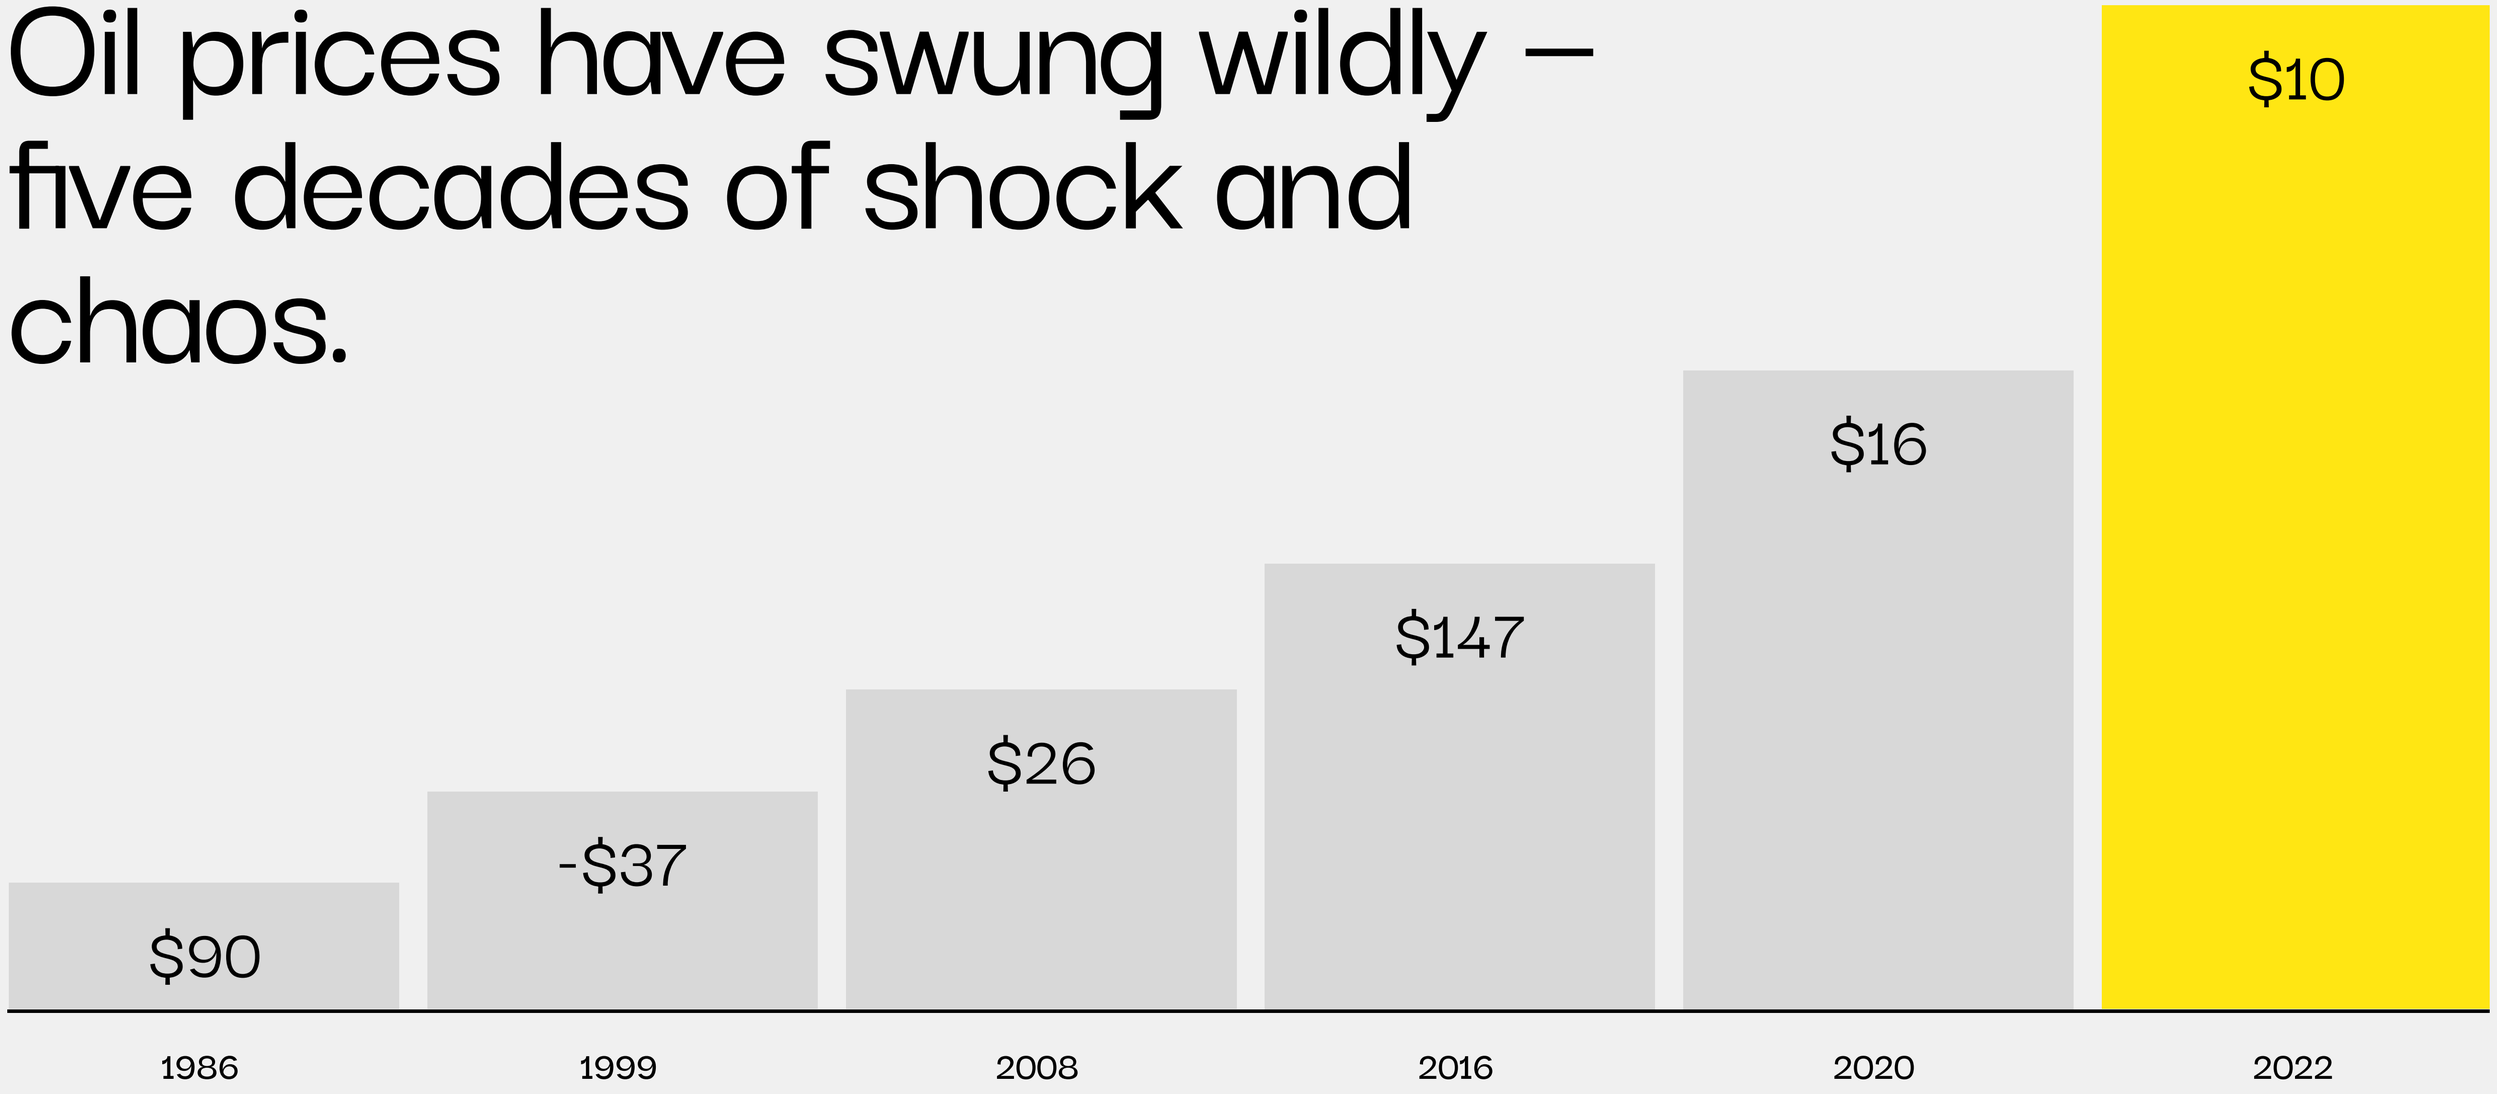
A Century of Chaos – historical price crashes and spikes that shook the global economy.

The Cartel – how OPEC wields production quotas as a geopolitical weapon.

Demand Shocks – recessions, pandemics, and the rise of electric vehicles.

Financial Alchemy – speculators, futures markets, and algorithmic trading.

Oil prices have swung wildly – five decades of shock and chaos.



OIL PRICE ANALYSIS

HISTORICAL

The Cartel

OPEC+ controls roughly 40% of global crude output, wielding production quotas as a geopolitical weapon. In 2014, Saudi Arabia deliberately flooded markets – prices collapsed from $115 to $27 over 18 months.

OIL PRICE ANALYSIS

DEMAND SIDE

The invisible hand is holding a futures contract.

”Futures contracts let traders bet on oil months ahead — amplifying price swings far beyond physical supply and demand.”

FUTURES

”Hedge funds, sovereign wealth funds, and algorithmic traders now move prices before a single barrel leaves the ground.”

LGORITHM

”$1.7 trillion changes hands in oil futures daily. Most traders never intend to take delivery of a single barrel.”

VOLUME

The barrel will always surprise you.
